

WALL COVERING
JENNY PINTO & JULIE KAGTI

The duo collaborated to make this woven scroll, which can be used as a wall covering, window dressing, screen or room divider or even, for lights. Jenny made the paper herself, while Julie wove it on a loom, like any other textile. Their goal was to make a paper textile that retains its "paperiness" but is more versatile.

FLOORING
USHA PRAJAPATI

Who would think of using handmade paper for a flooring mat? Usha Prajapati has. Her *chattai* is woven using a combination of recycled paper waste and thin reeds. The fun element is created by introducing multicoloured twisted strips of paper randomly.

STUDENT
AVNISH PRIYA GAUTAM

A National Institute of Design student, Avnish's futuristic looking chair design has an exposed stainless steel frame with injection moulded polyurethane foam seat. The seat has a metal insert, and can be adjusted to three or four positions according to the user's needs.
